Apple Mac iPad iPhone Watch TV Music Support iPhone 5 is cool and perfect for many older people because it provides a very simple, intuitive interface for making and receiving phone calls and doing things like checking email and playing music. With easy-to-use tables in this guide, you can get up to speed with different iPhone settings. At the right time, you'll start learning the skills you need to become a confident iPhone user. Use your iPhone's general settings to customize your core functionality for everyday use. You'll get access to the general settings in the next table by clicking the Settings app icon on the Home screen and then clicking on Shared. The Settings Description shows information about downloaded content, apps, memory, iPhone serial number and model, and your Wi-Fi and Bluetooth addresses, as well as support as well as legal and regulatory jargon. Software Update Use this setting to check available updates for iOS via iCloud. Use Check items that back up to iCloud and buy extra storage. Also, turn on the display in the state bar to indicate the percentage of battery available. Siri Turn on or off Siri's personal assistant function, set the language to be used, and decide to turn on or off the voice feedback settings and raise to speak. Turn on or off LTE, select roaming options, activate your personal hotspot, and choose which app to use cellular data from. VPN sets up and turns on and off virtual private networks (VPNs). iTunes Wi-Fi Sync syncs wirelessly with a copy of iTunes on a nearby computer when you connect to the Wi-Fi network. Spotlight Search Access settings for what types of content the iPhone search feature returns in search results. Auto-Lock Set a time for inactivity in which the iPhone automatically locks the screen. Locking your password Will set the password and turn on the feature to require a password to unlock the iPhone. Install your iPhone to delete all the data after ten failed attempts to enter the correct password. Restrictions impose restrictions on Safari and iTunes, and limit the installation of applications and location services. Include permitted content for music, podcasts, movies, TV shows, and apps. Date and time select 24-hour time and time zone and set the correct date and time. Keyboard Set keyboard correction features such as auto-capitalization and spell check. International Enter the language for information on the screen and keyboard. Choose a region format for dates, times, and phone numbers. iPhone accessibility kit features for people with visual, auditory or agility problems. Reset all settings or settings you've chosen, such as or keyboard, to factory by default. For the social and organizational parts of your brain, the iPhone makes Mail, Contacts and Calendar apps available; settings for these apps are shown in the following table. You get access to the settings listed here by clicking on the settings icon on the home screen and then clicking Mail, Contacts, Calendars. Set up the iCloud Description Select to sync mail, contacts, calendars, reminders, bookmarks, notes, photos and documents, and data from your wireless email account using iCloud. Set up Find My iPhone. Add an Add and Manage email account. Bring new data Enable/switch function that automatically pushes you to new emails, contacts, and calendar information for Microsoft Exchange and iCloud accounts. Show Set how many recent posts to show in the mail. Preview Set how many lines in e-mail messages should be sent in the inbox preview. Display the To/Cc Label Turn display of the To/Cc tag in an email. Ask to include a confirmation dialogue before deleting your email before deleting it. Download remote image management to see if the images appear on the i-email websites in the emails; displaying such images can allow the site to gather some information about you and your iPhone. Organize Thread Turn to organize responses to emails to anyone so that those messages appear together in the stitcher. Always Turn on Bcc Myself to send a copy of each email to yourself. (This is in addition to keeping a copy in the Sent folder.) Increase the level of quote Add one level of indentation to the text when you respond to a message. Signature Change signature at the end of all messages. (Sent from my iPhone is the default message.) Sort the order To specify the sorting order for contacts (first/last or last/first names). Display Order Specify the order of display for contacts (first/last or last/first). My Information Access contact list is to choose one to base your information on. The default account is to indicate which account the apps will use when you're dealing with your contacts. Import SIM Contacts Import contacts are stored on the SIM card of the phone in the Contacts app. New invitation alerts include alerts when you receive a new invitation to the Mail. Time zone support Include time zone support to show event data and time in the time zone; set your time zone. Synchronize control of how far back in time events sync when you sync with iTunes via calbe or Wi-Fi. The default time to set up a default time increase for alerts (for example, on the day, day before, and so on) before birthday, event, or event throughout the day. Choose from a built-in calendar program or a calendar from a synchronized program such as Gmail or AOL. General alerts Turn your iPhone to notify you when events shared between two or more calendars have been changed or deleted. The default list determines where reminders of what you're creating outside of a specific list will be stored. Getting online with your iPhone is easy to use your Wi-Fi or 3G/4G LTE capabilities. Once you're online, bundled by your browser, Safari, it's your ticket to a wide world of information, entertainment, education and more. You can customize and improve your Safari experience, access the settings and change them in The table simply tap the Settings icon on the Home screen and then tap Safari. Set up Search Engine Description Select among Google, Bing, and Yahoo! search engines. AutoFill Turn on AutoFill to automatically fill in contact information, names or passwords when you enter. Links Open Control, whether the associated pages are opened on a new page or in the background. Private browsing enables private browsing that prevents Safari from storing information about your browsing activities or turning it off. Pure Story Click to clear the history of the websites you visited in the browser. Clear the cookie and data to clean up any website cookies and data that has been stored on your iPhone. Use cellular data turn on to allow your cellular network to keep items on your reading list on your phone so you can read them offline. Fraud Alert Turn on the feature to alert you when you go to suspicious websites. JavaScript Include this to enable JavaScript-based features such as tipping and pop-up menus and some other browser-generated content to run in Safari. Block Pop-Ups Include this to block (most) pop-ups from displaying in your browser. An advanced overview of the data stored on your device on individual websites and allow you to debug the console to display the information to help you eliminate errors when displaying web pages. You'll be amazed at the apps available to your iPhone. You can download any of these fun, free apps through the App Store so you're going with your iPhone: Reading/Drawing/Pictures Magic Drawing Pad for iPhone Short Stories eReader iBooks iBooks Bluefire Instagram Bookmark Photo and Video Music and Video TuneIn Radio Virtuoso Piano Free 2 HD Pandora Radio HBO GO Djay for iPhone (99 cents) Games Jump Out!
