Easy to connect I put the Crucial MX500 in them and connect them to an ANKER desktop USB 3.0. I'm upgrading my HP from a 1TB hard drive to 1TB SSD. Connected to the SSD and worked just fine. Make them useful with this excellent, affordable housing. The plastic case is lightweight and feels sturdy. The case is plastic, which is not great for protection or thermal, but if you use SSD, which is what this case is basically for, you should be ok with the thermal. Got it for less than \$10, the SSD went in easily and it doesn't feel far-fetched or free. The plastics feel a bit cheap, but still looks good. ... I suggest using the included foam on top or you set the drive for a solid/snug feeling fit once the person slips into the lock position. I've dropped this thing countless times and its still holding up a big bang on wood. - Body durable plastic ... Good plastic, good controller that doesn't flake, and good cable too! It's a simple little gadget that's easy to use, has good instructions, and seems sturdy enough for what it's worth. my SSD translation has been completed. Unrelated, the new SSD brought life on an old laptop. For the price, the performance is excellent. Doing the job! I have two of them, one with a 320GB spinning drive and the other for a 500GB SSD. I put the SSD in, hooked it up and it worked great. I recycled a 5 year old Samsung EVO 850 SSD and it worked as soon as I turned it on. I use WIN10 Diskgmt to initiate and format SSD. Very cost-effective. The price was reasonable. It saved me a lot of money because I don't have to go for a better purchase to do it for me. It is a lightweight simple product and made very well in value. Good price too..... For the price, the performance is excellent. For the price and exceptionally good product. Can't beat the price either. It opens and the locks are firm, really firm. Expecting a shabby looking case, but it was a surprise that I got fit my hard drive perfectly would buy from the seller anytime..... It's an inexpensive plastic case, but well done, everything works well, and the drive is perfect and was easy to install. This fits my Samsung Evo SSD perfectly! I suggest using the included foam on top or you set the drive for a solid/snug feeling fit once the person slips into the lock position. However, it is very safe once clicked into place. I came across this and reviewed the product on Amazon and StartPages - at the cost of the cable included it's perfect and keeps the SSD drive safe and secure. The tool's smaller mechanism is locked tightly and the drive fits perfectly into the case. The drive came up on my desktop at once, and seems to work flawlessly in all relationships. Worked as intended I've had this for about 4 weeks and I'm very happy. Since then, they have continued to work perfectly. So far it has worked flawlessly. Out of the box works fine. Perfect for my old hard drive laptop that I wanted to save when my laptop finally died and needed to be replaced. It worked without problems at all! Order more of them to make cheap portable USB drives. Bought it to replace my old case and looks like with the WiiU and other older devices that use USB 2.0 or less will need a Y cable to give it enough power, the problem is that these cables are hard to find here on Amazon or might need another kind of Y cable basically have scenarios:..... Slide the disk into the case, connect it to your computer, and it appears as an external disk that you can read and write! Even with my laptop hard drive. Comes with a USB cable needed, so all I had to do was slide my 2.5 HDD, format it, and start using the drive as a portable. Most importantly, I can use USB 3.0 to copy data from HD to SSD without any interruptions or glitches. It was a standard USB USB Cable. There's no problem connecting to your PC via USB output. Came with a USB cable. Two USB-A Men on one USB-A female cable Y: was able to find it here, but do not want to use two cables to connect only one device. The USB cable is very durable with type A connectors on both sides. Since I bought two I keep one cable at home and one in the office. and don't let the odd usb cable fool you, they're easy to find and the connector is a lot less of a nuisance than a mini usb or type C and the best part of it is you can use this setup with the shared cable they have as I customize it with any android or apple phone that allows external storage so its versatile as well. This is a good quality case, with a handy on/off switch to disable storage without tugging on the cables. The USB3 cable is a big duty, and able to maintain upwards of 250MB/c transfer rates. Even if you lose the cable it's easier to find USB usb calber rather than SATA on USB. The cables included are of high quality. The usb3 cable included is thick and quality. used this product for a number of tasks ranging from extracting data from old hard drives (PS3 and Windows downloaded), rebooting Mac software, etc..... Compatible with Windows, MacOS and Linux. Google for How to Fix a Mac USB for more help. I used it to clone both mac and Windows drive without problems. I love that it includes Acronis software. Managed to get the hard drive detected windows by going to the drive manager and deleting all sections of the playstation. Pi reports this as a UASP device, and the browser performance is good. So far so well failed to get cloning software to work. The Wii is hacked, and as such, I have backups of all my games out there to protect the drive drive. Replaced the hard drive in my computer and wanted to use the old drive as a backup drive. Just wanted an external hard drive case for my old computer's hard drive. Installed easily and formatted it instantly for the Mac using a utility drive. I then renamed the disc, tagged the new letter disc, and everything was great. The next stop will be looking for a case to put the CD disc in :-). ... Even with my laptop hard drive. Primarily to store my old DVD for easy access. Feels well built. good round edges with a small pretty blue light on top. The plastics feel a bit cheap, but still looks good. Also, the transparent package looks very :)..... I like the way it looks in the dark Will be updated on durability, but now looks good. This Is awesome it feels permium with good packahing. I like the design. For curiosity, I did the next test test (see attached image). A good product just like pictures.... That's how it's described. Works the way advertised. The product is as described. Excellent product as described. Excellent, works exactly as described Well, it's arrived and it works like a charm. He arrived sooner than expected. I'm happy with the delivery time and the fact that it really works. The product arrived promptly and worked as stated. The one I got works well for me..... This little box did the trick. Arrived a day earlier than expected. Cases sent quickly and arrived untouched. That's how it's described. Works the way advertised. Works the way advertised. It was exactly as advertised. Just as advertised. Works as directed. Excellent product as described. That's how it's described. They have a power switch and a large but power light. I like the blue light light that it feeds on the switch. But it's actually a pretty cool feature. I have purchased several of their products and I am always satisfied with the overall packaging, from features to quality to price. I like the switch and the light too. This is a simple case of light showing when it has power. An added bonus is the switch off. Turn on/off the switch and drive. I especially like that there is a dedicated switch. On/off is convenient. It even has a switch! The button is convenient. Click type after each command: Fast installation with power button. After safely ejecting the disks from the OS, I recommend turning off the device with a power button before following use..... I like the switch. if it weren't for the fact that returning it wouldn't be carbon neutral (and price), I'd have returned it. I went back to the enclosure and got a loan. I bought this case and didn't open the package until after 30 days of returning the policy. I ended up bringing it back. I was fiddling around trying to make it work for too long, and now I can't get it back. I had to return it..... My right to return ended June 5th this is the 10th. Sent Sabrent 2.5 back. Installing HD or SSD couldn't be easier. This fits HD well. This isn't the first HD enclosure I've bought, and they're by far the easiest to set up. Use for an SSD drive for my AIR-TV OTA recorder. Feels protective and a great way to prolong the life of an old. It's easy to install SATA HD from an old laptop without tools. I bought this to put an old SSD HD in..... I can check the data from my old HD..... They fit into my pocket/portfolio. It is a lightweight simple product and made very well in value. It is quite durable, while remaining relatively easy for portability. Very convenient and easy. There is no extra power needed as it is for this size in general, so that's good. Now I use the old drive in my new case as a backup, and very portable. It's a pretty compact and minimalist design. The thin light weight design is tough enough for everyday trips. Works well on a small table. Hands down is a terrible product and I wouldn't trust it with my data. Physically, this thing is cheap plastic and doesn't conveniently fit a 2.5 hard drive. The USB connector feels cheap and will wear out, but overall I would buy it again. It's a far-fetched feeling and then snap it apart feels like I'm on the verge of breaking it. ... so feels a bit of nit picky but its true. Feels a little cheap. And click Download. I like the software comes with it. So far so well failed to get cloning software to work. Now you can access all my old files. The best thing you can do is list all the existing software on your computer before crashing and put all the passwords on the Excel table. Exit (close command app).... While backup software varies in features, now not only will I have copies of individual files, recovering from a catastrophic event is as easy as sharing HDD from the case to my laptop - well, this is pending my laptop has not been destroyed or stolen. I finally went online and found a section of the program called AOMEI. I don't need to worry about transferring all the files to my new computer (or cloud) and I also have a lot of space left to use as an extra external hard drive. I used other drive trays and it was the easiest to use. This means that you have to go old school with an ejection device from the Tray system to assure everything is closed on the drive before disconnecting. Now I have more memory than I know what to do with! I wouldn't expect another product in this space, and at this price to be noticeably better anyway. Extra SSD in your drawer? More storage is needed - more of these. It took less than a minute to get it up and running. I was up and running a few minutes after I got Not too sure about the toughness of the case in the long run. Great look, with clear lights to tell you it works. One of the simplest to open I came across. First of all, I work on computers and I also edit audio and video files for various companies for commercials, demos, theatrical events, and this is my side of business and hobby. ... So I move around a lot of big raw and swinging and various video files and backup apps and then there's Windows 10. I was able to initiate the primary section and then format it in the NTFS. File copy size: 5.5GB windowsImageBackup file. Warning about energy/power requirements: ... He has the power to switch too. I like the power switch. Power switch is always a plus..... Sent Sabrent 2.5 back. However, it didn't work on arrival, which was very disappointing. The product was defective on arrival. I like that it's clear and it lights up when in use. I think the clear version is pretty great. The clean case looks cool. I use this for my Wii in my retro gaming setup. plays games and movies on it..... Used with the MX500 1tb for my Xbox 1 and saw the download time drop from 15-45 seconds depending on the game. This thing has been doing heavy Xbox games for 2 years, then I switched it to my computer for the same purpose and it works flawlessly between two systems (format required, of course). I didn't have a problem with data transmission. This is designed for simple data transfer..... It also gives you instant access to old data. Simple clean inexpensive - all good..... The second is when I manually changed the sequence of the device after a clean download with no devices attached. Clean the 'readonly' attributes and then 'clean up' the volume of the disk. There should be some bone firmware piece or some other design flaw with this enclosure. I downloaded and installed their last firmware and still does not work. Works fine and no drivers needed on the Mac..... Popped my SSD drive, set took 15 seconds, hooked it up and accessed my files using windows and Linux without the drivers needed. Bought to back up my lap top papers and photos. For 9 bucks, I saved a bunch of priceless cat pictures (I'm sarcastic here - it's basically crap). For curiosity, I did the next test several times (see attached image). there is no lag no problem! Plan for the inevitable accident. The USB cable is like 2 feet long, but its perfect for my needs. Honestly, I was surprised that the device was of such good quality, and the cable provided more than long enough. The packaging was great. The packaging was first class as well. Both arrived on time and in the appropriate package. The light display works the way it should blink when the data accelerates. clearly visible LED operation. Pretty bright activity LED (Personal Con).... I thought I lost all my pictures on it..... With this product, I was able to recover so many images and videos myself. I have a phone camera that takes very data-heavy photos and videos, and as such I have accumulated over 40 gigabytes of valuable memories. Light weight, great design and work! It is best used with an SSD that has no internal moving parts, as this case is very light weight. The thin light weight design is tough enough for everyday trips. I hope this lasts a long time though. Took a couple of hours of FYI.
